1 About Wind Hardware

When it comes to industrial hardware supplies and resources, Wind Hardware & Engineering is a leader in North America. We design, manufacture and manage an end-to-end supply chain for a wide variety of industrial hardware products including cam locks, furniture locks, drawer slides, handles, hinges, casters and fasteners. If you need a hardware component for your finished product, rest assured that Wind Hardware & Engineering is a trusted supplier you can count on.

Wind Hardware & Engineering has been a leader in quality and customer satisfaction since 1949, serving large and small manufacturers of office, industrial and laboratory furniture, dispensers, electronic enclosures, security products, woodworking, displays, luggage and cases as well as U.S. Government contracts.

For more information, email the Wind Hardware & Engineering team at sales@windcorp.com.

We deliver outstanding value through our Engineering, Quality, Supply, Custom Solutions and Service capabilities.

ENGINEERING

Wind Hardware & Engineering employs a full-time staff of engineers who will work efficiently and cohesively with your engineers and manufacturing team to produce technical drawings, CAD/CAM designs, including 3D Modeling to prototypes and pre-production samples. By working directly with you and your team, Wind Hardware & Engineering saves you time, money and helps to prevent delays in manufacturing, excess inventories and costly oversights that can occur in the design and prototyping processes.

QUALITY SYSTEMS

We achieved ISO 9001:2000 certification in 2004 and constantly strive to maintain exceptional standards and preserving quality processes. We've implemented quality control procedures in every aspect of our business to ensure that we consistently deliver on our promise of quality. In conjunction with these standards, we execute ISO compliant systems: where product quality is monitored and tested at all stages of production including pre-production, in process, post-production and at the point of shipping. Wind Hardware & Engineering also warrants its products against defects in materials and workmanship.

SUPPLY CHAIN

If you're an original equipment manufacturer (OEM), you'll be happy to know that Wind Hardware & Engineering provides complete hardware component sourcing solutions. Core to our value proposition is taking the difficulty out of sourcing small, but mission critical components required for your manufacturing operation. Wind Hardware & Engineering's supply chain and services streamline the procurement and fulfillment processes, reducing costs and improving profitability while driving reductions in inventory levels. The end result is a better return for your business.

CUSTOM SOLUTIONS

We realize that, in today's business climate of short project timelines, customization and pressure on price and lead time, sometimes a standard component or supply chain model just won't do. That's why, in addition to a wide variety of standard and stocked components, we specialize in developing custom components and supply chain solutions that help you simplify your business, reduce total cost and get to market faster. Wind Hardware is ISO 9001:2000 compliant with products that are NSF certified and conforming to European RoHS and Semi S8 directives. If you can't find the right hardware component in our catalog, our team can make it for you and develop a supply chain model that meets your specific needs. Within a few months, you'll have the parts you need to get on with business.

SERVICE

The average tenure of our sales and customer service team is over 10 years and we realize that, ultimately, service is what wins and keeps customers. Everyone in our organization, from our sales team to our warehouse team, is focused on one thing: satisfying our customers. Our product knowledge, design capabilities, customer service and responsiveness are second to none and the primary reason we enjoy long lasting relationships with so many satisfied customers across so many industries.

CATALOG DISCLAIMER

Every effort has been made to ensure that all dimensions and diagrams are correct. It should be noted that dimensions of products, design of products, and availability of products is subject to change. For detailed information on any of the products in this catalog, contact your Wind Hardware & Engineering sales representative.

Wind Hardware & Engineering warrants its products against defects in material and workmanship to the original purchasers of product as originally installed and purchased. This warranty does not cover product which has been damaged due to abuse, modifications of product, improper installation, excessive loads, or product used in applications not approved by the company. We will send the original purchaser a replacement, similar or like model, at no cost. This warranty covers replacement of original product only and does not cover costs to remove, re-installation, or other incidental changes. To obtain a replacement product covered by this warranty, simply contact us at 1-800-946-3267.

“ We have been a customer of Wind Corp. for over 20 years. As a manufacturer we are always striving to find material quickly and at the lowest price. Wind has been a great partner in achieving this goal. Many companies are looking overseas for material but often have to procure larger quantities than necessary and the lead times are extremely long. Companies like Wind Corp have helped us avoid having to make such an investment. Both their stock levels and prices are a perfect fit for our business and I would highly recommend them to everyone. ”

John, Display Industry, Rhode Island

10313 - 7/16" CHROME PLATED CAM LOCK

- Zinc alloy die cast housing & cylinder
- Chrome plated
- Hex nut mounted
- Hex nut cam lever mounting
- 90° clockwise rotation
- Key removable in both positions
- WS93 key combination
- Two keys on a ring

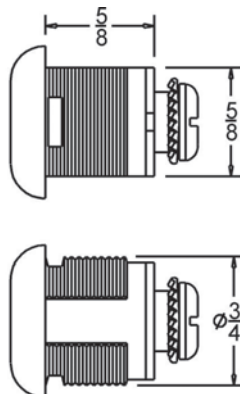

10293 - 5/8" CHROME OR BRASS PLATED CAM LOCK

- Zinc alloy die cast housing & cylinder
- Chrome or brass plated
- Hex nut mounted
- Screw-on cam lever mounting
- 90° clockwise rotation
- Key removable in both positions
- WS93 key combination
- Two keys on a ring

10168 - 5/8" STAINLESS STEEL FACE CAM LOCK

- Zinc alloy die cast housing & cylinder
- Hex nut mounted
- Screw-on cam lever mounting
- 90° clockwise rotation
- Stainless steel scalp & plug face
- Key removable in both positions
- PK625 key combination
- Two keys on a ring

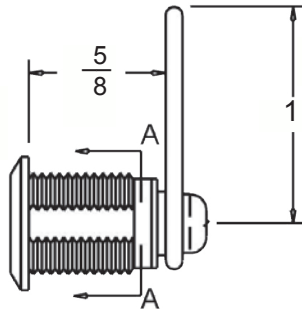

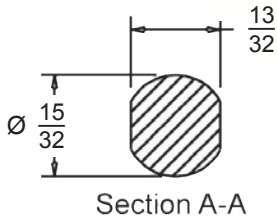

5 Cam Locks In Stock

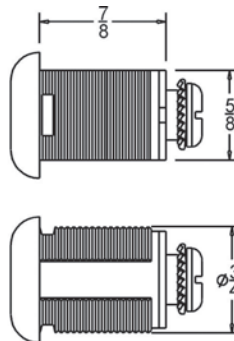

10265 - 5/8" CHROME OR BRASS PLATED MINI CAM LOCK

- Zinc alloy die cast housing & cylinder
- Hex nut mounted
- 90° clockwise rotation
- Key removable in both positions
- Chrome or brass plated
- Supplied with assembled 1" straight cam
- W-23 key combination
- Two keys on a ring

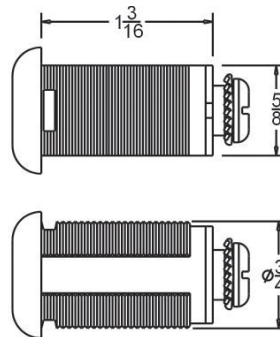

10296 - 7/8" CHROME PLATED CAM LOCK

- Zinc alloy die cast housing & cylinder
- Chrome plated
- Hex nut mounted
- Screw-on cam lever mounting
- 90° clockwise rotation
- Key removable in both positions
- WS93 key combination
- Two keys on a ring

10363 - 1-3/16" NICKEL PLATED CAM LOCK

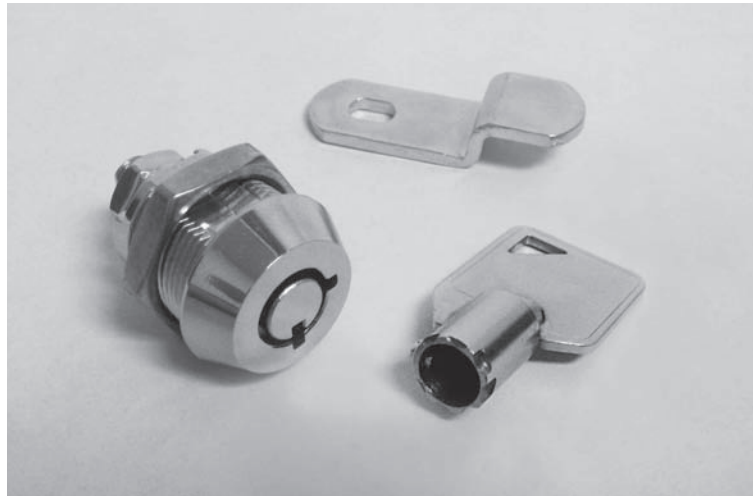

- Zinc alloy die cast housing & cylinder
- Nickel plated
- Hex nut mounted
- Screw-on cam lever mounting
- 90° clockwise rotation
- Key removable in both positions
- C415A or WS93 (10857) key combinations available
- Two keys on a ring

“ Wind Hardware & Engineering become a trusted partner for our business. Their quality and on time delivery is a given and we are happy to maintain and grow our business together. ”
 Jorge, Commercial Irrigation, California

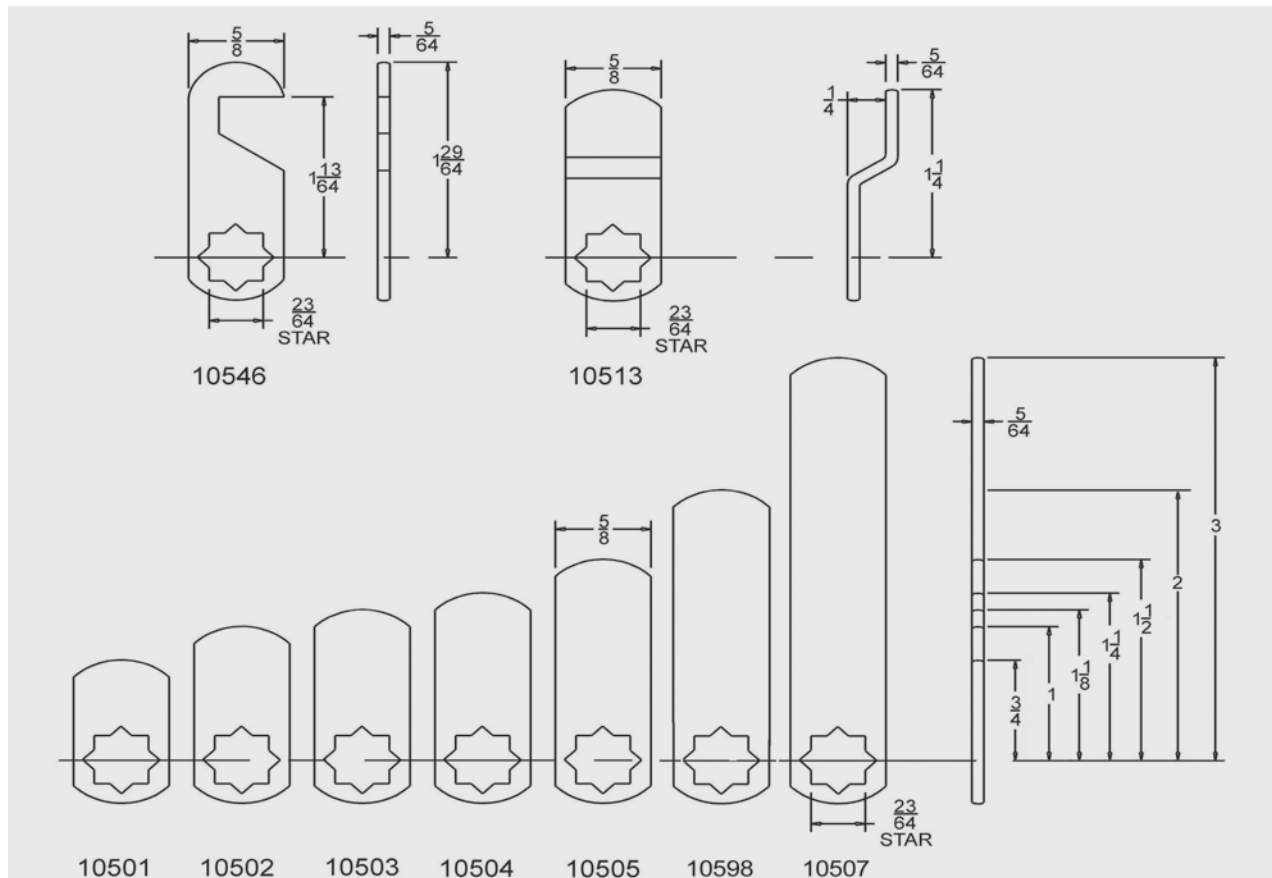

10612 - 17mm (43/64") CHROME PLATED TUBULAR KEY CAM LOCK

- High security 7 pin tumbler
- Zinc Alloy die cast housing & cylinder
- Hex nut mounted
- Hex nut cam lever mounting
- 90° clockwise rotation
- Chrome Plated
- Double pull, key removable in both positions
- Supplied with 1-1/4" long offset cam lever
- #2101 key combination
- Supplied with one key

STOCK CAM LOCK LEVERS

These cam levers are in stock and available for immediate shipment. In addition, Wind Hardware & Engineering can manufacture custom orders for you in any size, shape, finish, or material. Please contact us with your exact requirements.

CUSTOM DESIGNS TO YOUR SPECIFICATIONS AVAILABLE

10259 & 10855 - SNAP-IN CAM LOCKS

- For quick mount / snap-in applications
- Zinc alloy die cast housing & cylinder
- Screw-on cam lever mounting
- 90° or 180° degree rotation
- Key removable in both positions
- Multiple key changes available
- For material thicknesses of 1/32" to 1/16"
- Various finishes available

10742 - FILE CABINET LOCK

- Zinc alloy die cast housing & cylinder
- Fork clip mounted
- Multiple key changes available
- Master keyed
- Core removable feature
- Nickel plated

12009 - TUBULAR PUSH KEY LOCK

- High security applications
- Zinc alloy die cast housing & cylinder
- Hex nut mounted
- Chrome plated
- Single pull, key removable in locked position
- Multiple key changes available

10436 - SPECIAL LEVER CAM LOCK

- Double cam lever application
- Zinc alloy die cast housing & cylinder
- Fork clip or hex nut mounted
- Screw-on cam lever mounting
- 90° rotation
- Various barrel lengths available
- Various finishes available

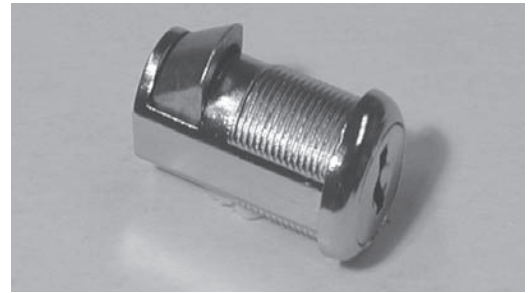

CUSTOM DESIGNS TO YOUR SPECIFICATIONS AVAILABLE**DOUBLE BITTED CAM LOCKS**

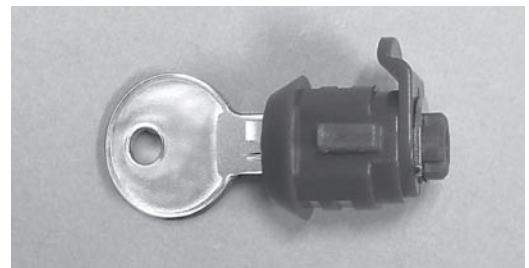

- Higher security 11 disc wafer mechanism
- Zinc alloy die cast housing & cylinder
- Hex nut mounted or fork clip
- Hex nut or spun-on cam lever mounting
- Various barrel lengths available
- Various finishes available

**10727 - SPRING BOLT LOCK**

- Slam action, spring returned bolt
- Zinc alloy construction
- Master keying available
- Up to 100 key changes available
- Various finishes available

**Plastic Cam Locks****10741 - PLASTIC SNAP-IN CAM LOCK**

- ABS material
- Snap-in mounting
- Push-on cam lever mounting
- Colors available (easy color matching)
- Nickel & other plating available
- Barrel length: 19/32"
- For material thicknesses of 0.125" to 0.15"

**10699 - PLASTIC CAM LOCK**

- ABS material
- Hex nut or fork clip mounted
- Screw-on cam lever mounting
- 90° or 180° rotation
- Barrel lengths: 3/8", 5/8", 27/32", 1-3/32"
- Chrome, nickel or brass plate available
- Various colors available

LUGGAGE & DISPLAY PADLOCKS

18017

- Zinc alloy with nickel or brass finish
- Two keys per lock
- **IN STOCK**

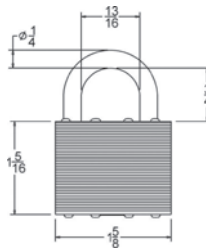

18071

- Solid brass with brushed finish
- Two keys per lock
- **IN STOCK**

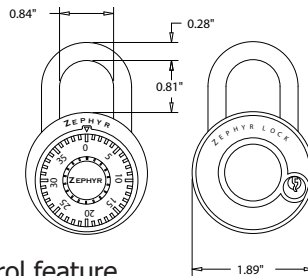

18051 - LAMINATED STEEL PADLOCK

- Meets ASTM-F883 specifications
- 200 key changes available
- Two nickel plated brass keys on a ring
- Hardened steel shackle
- Zinc plated

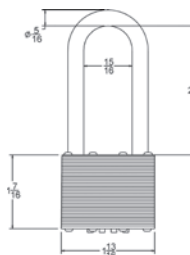

1925 - KEY CONTROLLED ANTI-SHIM COMBINATION PADLOCK

- New anti-shim feature resists the most common shimming methods
- New case hardened steel post added to shackle for added protection to lock mechanism
- Stainless steel body for greater security & durability
- Supervisory key control
- Hardened steel, chrome plated shackle
- Requires a padlock eye of at least 5/16"
- Also available without supervisory key control feature

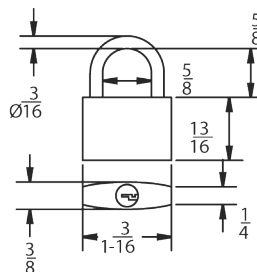

18050 - LAMINATED STEEL COMBINATION PADLOCK

- Meets ASTM-F883 specifications
- 10,000 resettable combinations
- Resets with change tool
- Hardened steel shackle
- Latch mechanism is a double dead bolt

18048 - SOLID BRASS PADLOCK

- Solid brass case
- Mushroom pins for security
- Hardened steel shackle
- Short & long shackle available
- Available in 20mm to 70mm sizes

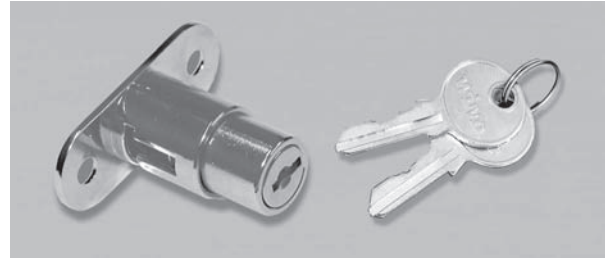

11 Furniture Locks

19034 - PUSH LOCK

- Rear mounted "push lock" ideal for applications which include sliding doors & credenzas
- Key unlocks & automatically withdraws dead bolt mechanism
- Easy one finger push to close & lock
- Can be master keyed
- Face ring available for finished appearance
- Various finishes available

10624 - REAR MOUNTED FURNITURE LOCK

- Rear mounted furniture lock application
- Zinc alloy die cast housing & cylinder
- Core removable & master key features available
- Dual entry key with plastic cap
- Face ring available for finished appearance
- Various finishes available

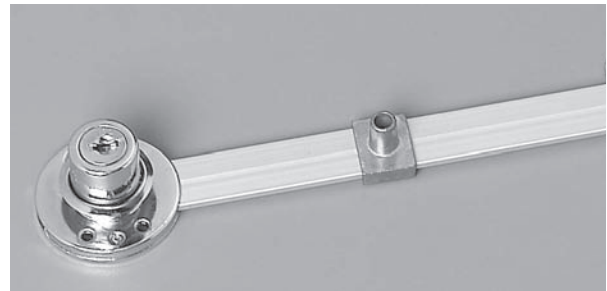

11020 - DESK DRAWER LOCK

- For desk drawers & cabinets
- Zinc alloy die cast housing & cylinder
- Various bolt configurations available
- Rear mounted
- Core removable & master key features available
- Dual entry key with plastic cap
- Face ring available for finished appearance
- Various finishes available

11022 - MULTI-DRAWER SYSTEM LOCK

- For multi-drawer systems
- Zinc alloy die cast housing & cylinder
- Includes control bar & fasteners
- Rear mounted
- Core removable & master key features available
- Dual entry key with plastic cap
- Face ring available for finished appearance
- Various finishes available

15048 - SLIDING GLASS DOOR LOCK

- Designed for locking sliding doors
- Zinc alloy die cast construction with steel locking bar
- Adjustable for various door thicknesses
- Special keying available
- Supplied with two keys per lock
- Various finishes available

10704 - POSTAL LOCK

- Pin tumbler / high security mechanism
- 1000 key changes available
- Zinc alloy die cast housing & cylinder
- Nickel plated
- Supplied with two keys & mounting clip

10617 - REAR MOUNTED POSTAL LOCK

- Rear mounted postal application
- Zinc alloy die cast housing & cylinder
- Screw mounted
- Zinc plated
- Supplied with two keys
- **IN STOCK**

10277 - REAR MOUNTED BRASS POSTAL LOCK

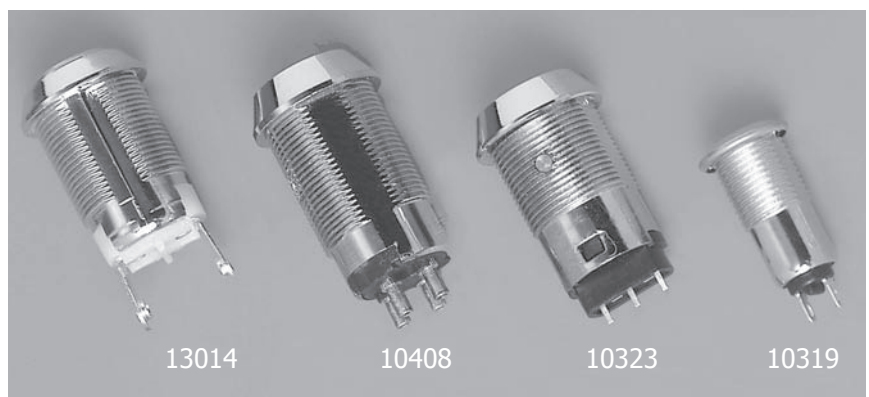

- Rear mounted Postal application
- Solid brass die casting for housing & cylinder
- Screw-on cam lever housing
- Screw mounted
- Key removable in the 12:00 position
- Supplied with three keys
- **IN STOCK**

Electrical Switch Locks

ELECTRICAL SWITCH LOCKS

- Available in various electrical ratings (both voltage & amps)
- Zinc alloy die cast housing & cylinder
- Hex nut mounted
- Tubular, double bitted, or single bitted keys available
- Various barrel lengths available
- Chrome, nickel, & black finishes

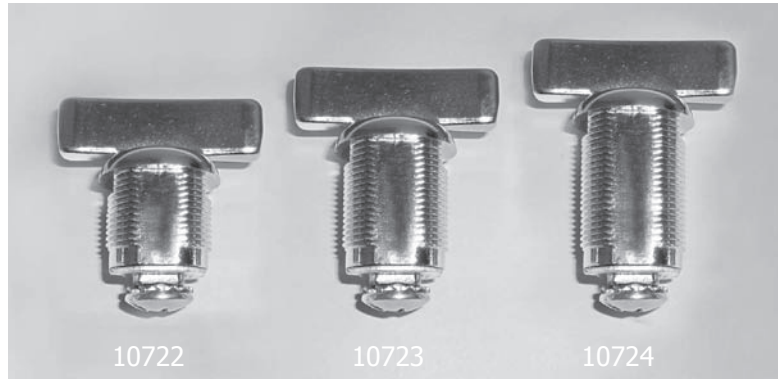

13 Quarter Turns

THUMB TURNS

- Zinc alloy die cast housing & cylinder
- Barrel lengths: 5/8", 7/8", 1-1/8"
- Hex nut mounted
- Chrome finish available from stock
- Supplied with a prong washer, collar and two levers
- **IN STOCK**

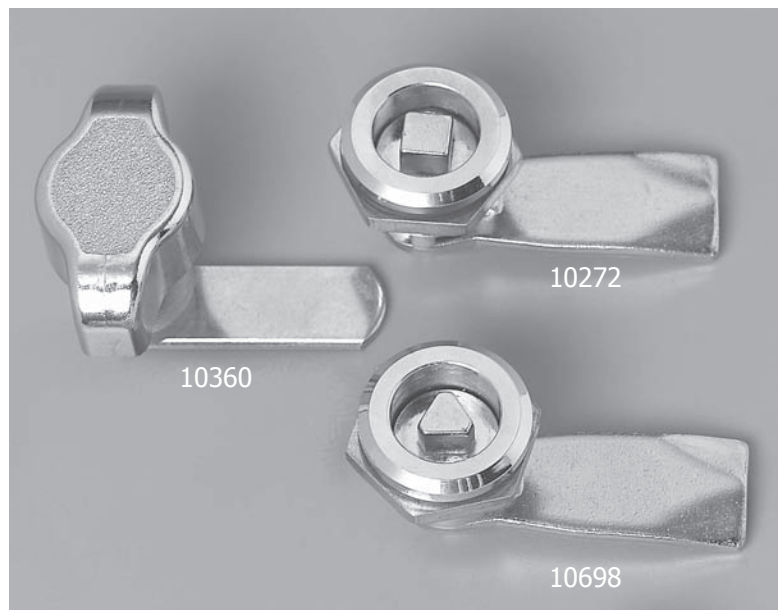

QUARTER TURN LATCHES

- Zinc alloy die cast housing & cylinder
- Barrel length: 5/8"
- Hex nut mounted
- Various finishes available

HEAVY DUTY QUARTER TURN LATCHES

- Zinc alloy die cast housing & cylinder
- Barrel length: 11/16"
- Hex nut mounted
- Operating tools available
- Various finishes available

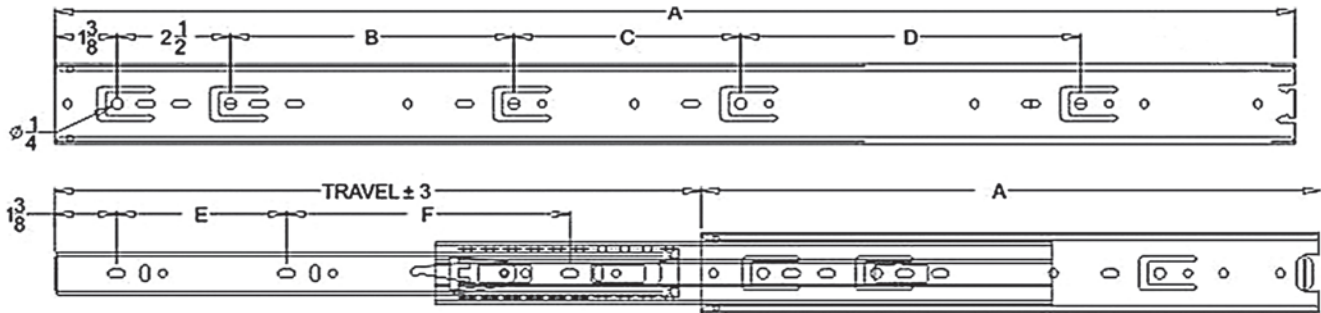

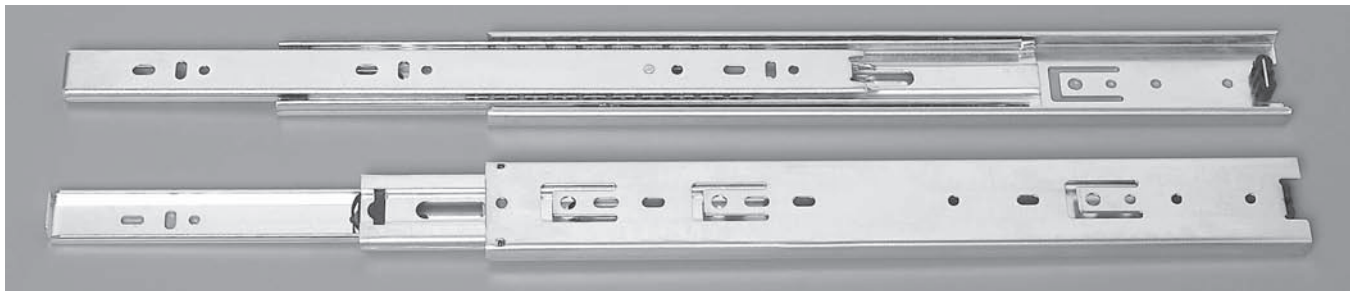

“ Our company has partnered with Wind Corporation for over 15 years, and we have been pleased with the partnership from the beginning. Wind has always gone the extra mile to keep the supply lines working.

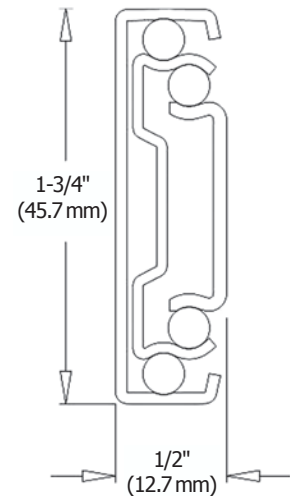

Jeff B., Fire, Safety, and Security, Minnesota ”

Disclaimer: Our drawer slides meet industry-accepted guidelines using a minimum testing of 50,000 cycles that follow the ANSI/BIFMA specifications. Each slide is rated for a dynamic load that will not fail using an 18" pair. The load rating of each drawer slide will decrease proportionally beyond the 18" length. The static load capacity of each model is at least twice the dynamic load rating even when the slide is loaded to its maximum rating. Each slide should be tested in the intended application by the customer to make sure performance is not affected.

CUSTOM DESIGNS TO YOUR SPECIFICATIONS AVAILABLE

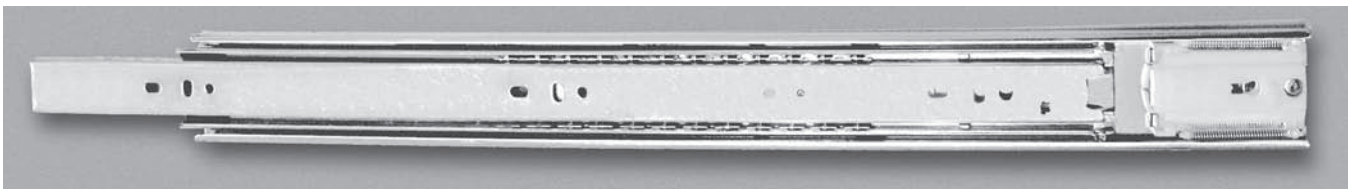

45MM 100 LB. BAYONET MOUNTING FULL EXTENSION

- Applications: Metal office & industrial furniture; metal cabinets, electronic enclosures and tool boxes
- Features: Simple insert type installation, separable inner channel, hardened steel ball bearings
- Slide Travel: 1/2" over travel
- Material: Work hardened cold rolled steel
- Finish: Electro-zinc plated with clear chromate; black electrocoat available
- Slide Lengths: Even lengths 10" to 24"; custom sizes available
- Load Rating: 100 lbs. per pair (18" standard)

“ Wind Hardware & Engineering has been an important partner in the design of our manufactured products for many years. We take pride in our quality and are proud to have Wind Hardware as part of our finished products. We recognize Wind Hardware & Engineering for outstanding service and quality.”

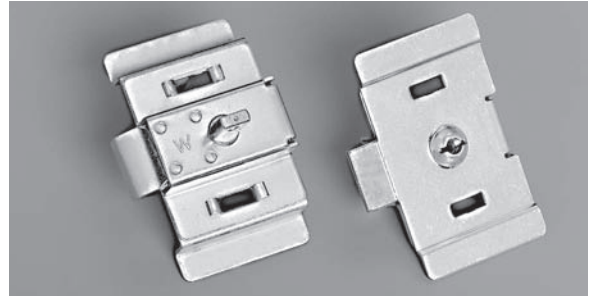

Betsy K., RV industry, California

21 Access Door Hardware

14260 - FIRE DOOR LOCKS / SLAM LOCKS

- Used on fire rated access doors & hatches
- Knob, ring or key operated
- Mounting plates to required specifications
- Available with zinc or copper plating
- Available in stainless steel

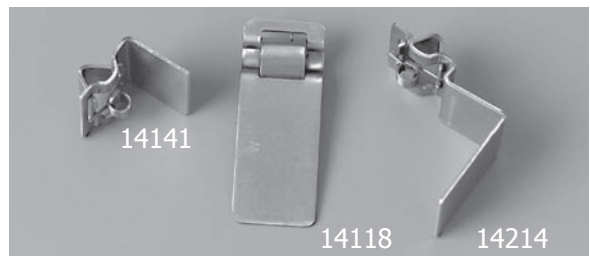

14286 - CAB LOCKS

- Used on access doors & hatches
- Left & right hand models
- Accepts 5/16" shank
- T handle available
- Mounting holes to required specifications
- Available in zinc plated steel and stainless steel 304 & 316

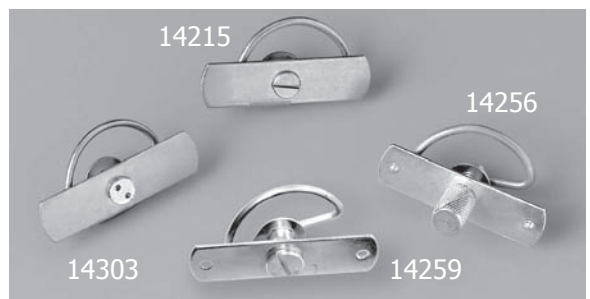

FRICTION SPRING CATCHES

- Used on cabinet doors
- Manufactured to required specifications
- Various finishes available

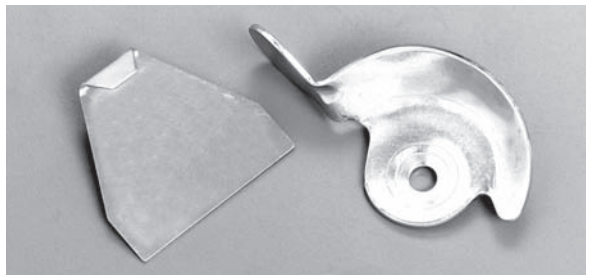

SPRING CATCHES

- Used on access doors
- Slotted head is standard
- Knurled knob, hex & torx head available
- Copper plating available for easier welding
- Available in various sizes, finishes & materials including stainless steel

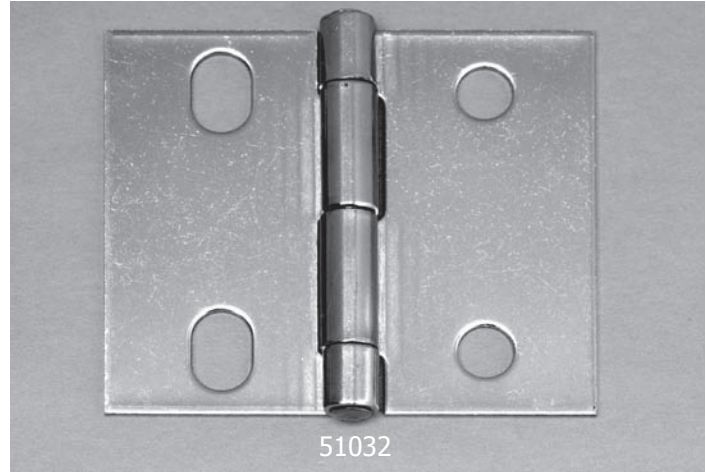

50028 - SASH LOCK & KEEPER

- Used on access doors and in the HVAC industry
- Steel with zinc plating
- Custom keeper styles available
- Available in stainless steel
- Various finishes available

STAINLESS STEEL HINGES

- Used on access doors and storage cabinets
- Heavy duty butt hinge (shown)
- Fixed or non-fixed pins
- Custom hole patterns available
- Available in stainless steel 304 & 316

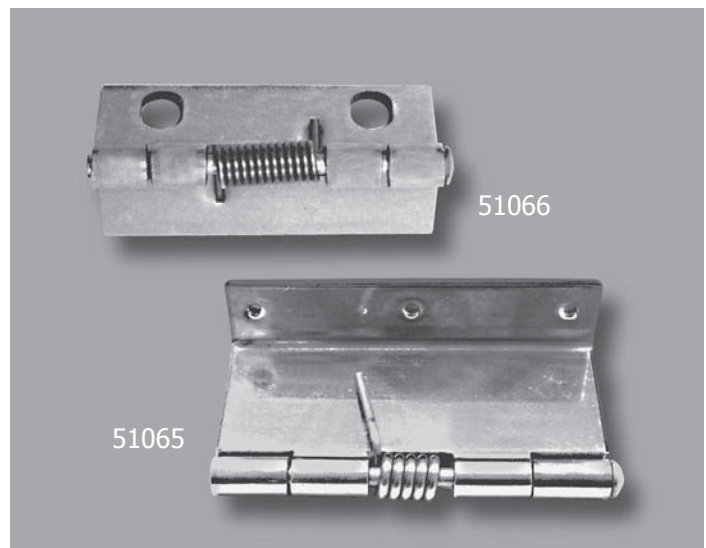

INSTITUTIONAL HINGES

- Used on educational & healthcare furniture, casework and store fixtures
- Five knuckle hinge with "Hospital Tip"
- Elongated screw holes for easy mounting alignment
- Available in steel or stainless steel
- Various finishes available

SPRING HINGES

- Used on access doors
- Fixed or non-fixed pins
- Custom spring strength per customer requirement
- Available in steel or stainless steel
- Various finishes available

“ Proactive in reviewing customer’s future needs as well as reactive in dealing with emergency shipments. Requested product information always received promptly; excellent customer service - great to work with. ”

**MEDIUM DUTY CASTERS**

- Available wheel options include rigid, swivel with no brake, swivel with wheel brake & swivel with total brake
- Various tread types available
- 75 to 125 mm (3" to 5") wheel diameters depending on wheel material
- 75 to 140 lb. load capacities depending on wheel material

**HEAVY DUTY CASTERS**

- Available wheel options include rigid, swivel with no brake, swivel with wheel brake & swivel with total brake
- Various tread types available
- 100 to 200 mm (4" to 8") wheel diameters depending on wheel material
- 200 to 350 lb. load capacities depending on wheel material

**EXTRA HEAVY DUTY CASTERS**

- Available wheel options include rigid, swivel with no brake, swivel with wheel brake & swivel with total brake
- Various tread types available
- 125 to 200 mm (5" to 8") wheel diameters depending on wheel material
- 400 to 700 lb. load capacities depending on wheel material

“ Over the years we have developed a friendship which I find uncommon in business today. You have always been very helpful with the products you supply to us. Your engineering department has also been very helpful from the point of view of making sure the parts are of good material and to spec. I don't think you can ask a company to do any better than you have.

Bill W., Cabinet manufacturer , Ontario Canada

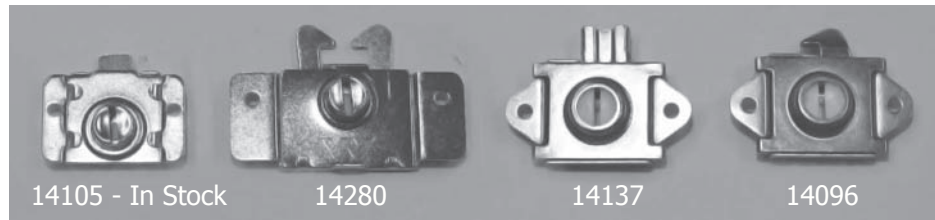

”

27 Dispenser & Cash Box Locks

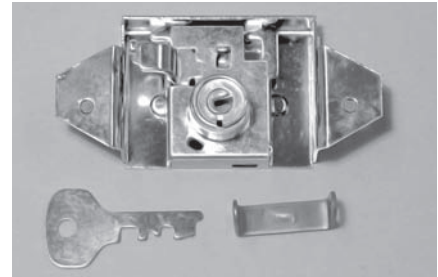

DISPENSER LOCKS

- Used on washroom towel & soap dispensers and cash drawers
- Available in different sizes, materials & finishes
- Dead bolt, spring action & hook lock mechanisms available

TRUCK & TOOLBOX HANDLES

- Applications: Truck Boxes - RV/Trailers - Tool Boxes - Enclosures - Cargo Compartments - Truck Body

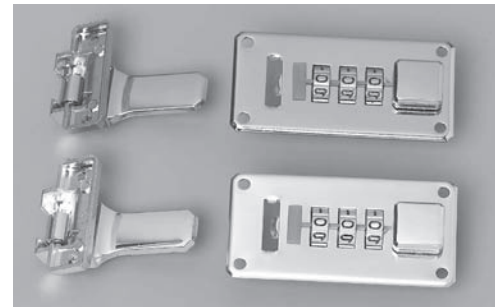

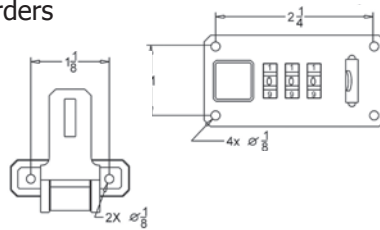

“Winds commitment to service has always been on time, which is very helpful in the up and down flow of production in the RV business. In addition, Wind Hardware and Engineering has been a quality supplier to our company for many years. Our relationship has expanded over the years because we can count on Wind Hardware and Engineering to deliver on their commitments and to think outside the box to achieve results. As their capabilities and global presence grows, we are finding new ways to meet our objectives through the partnership that our companies have established. We know that when we test Wind Hardware and Engineering they rise to the challenge.”

Cindy, RV Manufacturing, Indiana
